

Key Investor Information

This document provides you with key investor information about the Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of the Fund. You are advised to read it so you can make an informed decision about whether to invest. Unless otherwise defined in this document, all words and expressions defined in the Company's current Prospectus shall have the same meaning herein.

Ocean Dial Gateway to India Fund (the "Fund"), a sub-fund of Ocean Dial Investment Funds plc (the "Company")

This Fund is managed by Ocean Dial Asset Management Limited

Class H US\$ (the "Share Class") (ISIN IE00BF11F672)

This Key Investor Information Document is also considered representative of **Share Class I Euro** (ISIN IE00BF11F789) and **Share Class J GBP** (ISIN IE00BF11F896) for the Fund.

Objectives and Investment Policy

The Fund's objective is to provide long term capital appreciation.

The Fund will invest primarily in a diversified portfolio of shares and equity related securities (such as preference shares, convertible bonds, convertible preference shares, ADR's and GDR's) of large and mid-cap companies that (i) have their registered office in India and are listed on Recognised Exchanges worldwide, (ii) exercise the majority of their economic activity in India and are listed on Recognised Exchanges worldwide and/or (iii) are listed, traded or dealt in on certain Indian stock exchanges.

A bottom up stock picking approach will be adopted, identifying companies with sound management, strong balance sheet fundamentals and a management whose interests are (where possible) aligned with outside shareholders.

Shares in the Fund can be bought and sold daily on every Business Day of the Fund (i.e. the Dealing Day). Subscription and redemption applications must be received by 13:30 (Irish time) on the relevant day preceding the Dealing Day.

The Fund may elect to pay dividends to its shareholders but does not expect to do so given its long term capital appreciation investment philosophy.

The fund manager has discretion in managing the investments of the Fund.

The Fund may use financial derivative instruments for both investment purposes and for the purposes of hedging. The use of these instruments may result in the Fund being leveraged i.e. the total exposure of the Fund as a result of all positions held by it may exceed its net asset value.

Portfolio transaction costs may have an impact on the performance of the Fund.

The Fund is expected to have a high volatility. The typical investor in the Fund will be a sophisticated investor with a medium to long investment time horizon who understands the risks associated with investment in the emerging markets

Risk and Reward Profile of the Fund

that the Fund is not only exposed to market price movements, but also to the value of the Indian Rupee relative to the share class currency. The Fund's policy is not to hedge Rupee exposure.

Further risks that may have a significant effect on the Net Asset Value of the Fund include:

- The risk and reward indicator has been calculated using the average fluctuations of the Fund's investment portfolio over the past five years.
- Historical data may not be a reliable indication for the future.
- The lower risk category does not mean a risk-free investment.
- The Fund may behave differently in the future. This means the Fund is not guaranteed to always stay in the same risk reward category.
- The high risk rating reflects the high degree of risk in investing in emerging markets generally, and India in particular. The market prices of Indian securities can move sharply on relatively small trading volumes. It also reflects
- Liquidity risk - the risk that a given security cannot be traded quickly enough in the market to prevent a loss or make a profit.
- Credit Risk - the risk that the issuer of a security held by the Fund may not be able to meet its obligations to the Fund.
- Settlement risk – the risk that the purchaser of Shares in the Fund does not settle within T+3 deadline. The Fund is liable for any movements in the Net Asset Value during the settlement period.
- The Company's Prospectus gives you more details about all the risks for the Fund - see under "Practical Information" for how to obtain a copy.

Charges for the Fund

| One-off charges taken before or after you invest | |
|---|--|
| Entry charge | None |
| Exit charge | 3%. This may be charged if you hold Shares in the Fund for less than 12 months |
| This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out. | |
| Charges taken from the Share Class over a year | |
| Ongoing charge | 1.20% |
| Charges taken from the Share Class under certain specific conditions | |
| Performance fee | There is no performance fee in respect of the share class |

These charges are used to pay the costs of running the Fund, including the costs of marketing and selling. Overall, they reduce the growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The annual report of the Company for each financial year will include detail on the exact charges made.

For more information about charges, please see the Fund's Prospectus, which is available at www.oceandial.com

Past Performance

The Class H US\$ share class was launched on 16 June 2017. At the date of this document, the share class does not have performance data for one complete calendar year to provide a useful indication of past performance to investors.
